

SK JAPAN CO., LTD.

COMPANY PROFILE

English Version

Welcome Message

We value our customers requests and provide meaningful “total service and total support” that contributes to the culture of daily life.

In recent years, the pace of change has been accelerating rapidly across various fields.

We are facing unprecedented challenges, such as economic instability, environmental problems, natural disasters, and declining public safety.

For this reason, SK JAPAN GROUP has set its sights on overseas markets. As the first step, we have established bases in Guangzhou, Shenyang, Nanjing, China, and created a system to support Japanese companies aiming to open stores in China.

Our commitment at SK JAPAN GROUP is to provide total support to Japanese companies and customers, maintaining a well-rounded approach.

We design, develop, and sell household appliances that meet the needs of our customers. As part of our ecological efforts, we also offer solar power generation systems.

Furthermore, we design, manufacture, install, and sell comprehensive security systems for crime prevention.

SK JAPAN GROUP will continue to prioritize emerging trends and the needs of our customers, aiming to deliver meaningful “total service and total support” that contributes to the culture of everyday life for you.
